Lordswood, Chatham,
Kent, ME5 8LF
Tel: 01634 868268
Main Contact: Quinn Laverty
E-mail: q.laverty@faithdean.co.uk
Telephone: 07885 307170

Welcome to the July edition of our monthly newsletter relating to the Leroy House construction project.

We are taking all practical precautions to mitigate the effect of the works on the building's surrounding neighbours, however due to the nature of the works, occasionally some inconvenience may be experienced and for this we apologise.

Brief Overview of the Project

The works involve the strip out of the existing office floors, the formation of an extension to the west end of the site, where the current carpark for the building was, extending the existing building up one floor and undertaking a full office fit-out throughout including creating an ancillary café space.

Progress of Works in July 2022

We have completed the external scaffold on Dove Road and installed the goods hoist onto the side at the eastern end. We will be continuing with Henshall Street and Balls Pond Road scaffolding. This scaffold will be wrapped with protective sheeting to help prevent dust emitting from the works. Once the scaffold is complete we will commence the installation of a security hoarding which will be fixed directly to the scaffold. The removal of the asbestos is also nearing completion.

Internally we have been stripping out the internal partitions, doors / frames and soft furnishings.

Forthcoming Works in July & August 2022

Over the coming months the strip out will be complete and the demolition phase will be fully underway.

Site Working Hours

The works will be continue to be undertaken between the hours of 8am and 6pm on Monday to Friday, and 8am to 1pm on Saturday's.

Environmental Matters

Deliveries and waste away are to be expected everyday between 8am and 6pm. The vehicles will be FORS accredited and drivers are instructed to switch off engines in order to reduce noise and air pollution.

Leroy House is currently collating data and information for the BREEAM assessment which we are working towards. This project is targeting a BREEAM excellent. We are using FSC only Timber, sustainable products throughout the build, reducing energy use/ CO2 emissions and promoting the sites ecology. The site is on track with regarding to our waste target of less than 98% to landfill and to recycle and reuse the remaining. We are also looking to see if we can do some rainwater harvesting on site to use for the construction activities and not use natural resources where we can.
